Alternative Asbestos Abatement Methods

The Asbestos NESHAP 40 CFR Part 61, Subpart M

NESHAP Requirements ...

- Specifies work practice standards designed to minimize the release of asbestos fibers during building demolition or renovation, waste packaging, transportation, and disposal.
 - removing all asbestos-containing materials
 - adequately wetting all regulated asbestos-containing materials
 - sealing the material in leak tight containers
 - no visible emissions
 - disposing of the asbestos-containing waste material as expeditiously as practicable

Proposed Alternative Method ...

- Foam Shield
 - Vinyl Asbestos Tile (VAT) and Mastic
 - Consider protocol as a non-friable removal
 - Will notify as friable removal
 - Dispose of material as friable
 - Want to forgo using full containment and negative air

Is this accepted in your state?

- Foam Shield representatives indicated that the product was being used in Florida, Mississippi, North Carolina, Georgia, Alabama, Ohio, New York

South Carolina Perspective ...

- Surfactant: A chemical wetting agent added to water to improve penetration, such as a non-sudsing detergent.
